Dynacorp® D2101 Control Part# D6001-448-004 (115VAC Input) Installation

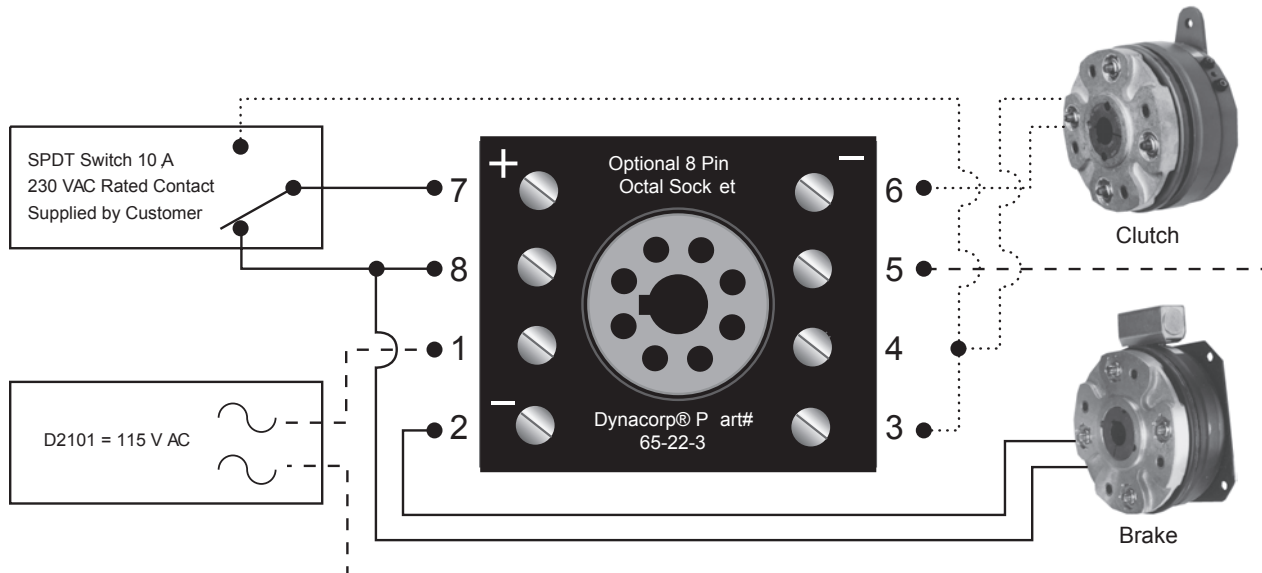

Description:

The Dynatec 2101 (D2101) is a plug-in clutch-brake power supply designed to mount into an eight pin octo-socket. The D2101 is engineered to operate a 90 VDC clutch and/or brake coil with current loads up to 2.0 amps. The compact plug-in design allows for ease of installation and replacement. The D2101 is fused on both input power lines to protect the controller system. This control incorporates voltage protection on the AC input to suppress transient spikes, present on some power lines.

Specifications:

Model D2101

Part # D6001-448-004
 Input V 115 VAC 50/60 Hz
 Output V 90 VDC
 Output A 2.0 Maximum
 Fuse (2) 3A, 250 VAC Micro-Fuse

Notice: Use wire and methods in accordance with Local, State, and National Electric Codes (NEC).

Package of 5 spare fuses available from Littelfuse® #225003 or Dynacorp #32-1-11
