Dynacorp® D2110 Control Part# 224215 (230 VAC Input) Installation

Description:

The Dynatec 2110 (D2110) is a plug-in clutch-brake power supply designed to mount into an eight pin octo-socket. The D2110 is engineered to operate a 90 VDC clutch and/or brake coil with current loads up to 2.0 amps. The compact plug-in design allows for ease of installation and replacement. The D2110 is fused on both input power lines to protect the controller system. This control incorporates voltage protection on the AC input to suppress transient spikes, present on some power lines.

Specifications:

Model D2110

Part # □ 224215
 Input V 230 VAC 50/60 Hz
 Output V 90 VDC
 Output A 2.0 Maximum
 Fuse (2) 3A, 250 VAC Micro-Fuse

Notice: Use wire and methods in accordance with Local, State, and National Electric Codes (NEC).

Base (Part # 65-22-3) ordered separately

Package of 5 spare fuses available from Littelfuse® #225003 or Dynacorp #32-1-11
